PROFESSIONAL PROFILE

Advanced Software Developer, committed to continuous learning and active participation in both Backend and Frontend development projects. Capable of creating scalable and user-centric solutions.

WORK EXPERIENCE

SwiftControl

Pereira, Colombia

Full-Stack Developer

2026 - Present

- Currently participating in full-stack development projects at SwiftControl, creating innovative solutions applied to business logic in complex systems, interactive design, and interfaces, increasing effective production capacity and quality for the company by up to 15%.
- Worked in a team with other developers, putting my fast and continuous development skills to the test.

Brunchosos Website

Pitalito, Huila, Colombia

Web Developer

2026

- Developed a website for a Coffee & Brunch themed coffee shop in Pitalito, Huila, Colombia. Applied my knowledge in building static sites using modern technologies and advanced AI tools. The product was developed with a focus on user experience and optimization, successfully boosting the business's productivity and popularity.

FEATURED PROJECTS

Armando la Navidad | HTML5, CSS3

2025

- Developed an interactive game using exclusively CSS (without frameworks or JavaScript) to manage layouts, typography, and colors.
- Created complex animations and fluid transitions, as well as true randomness logic and CSS transformations, while ensuring a responsive design.

News Portal | React, TypeScript, Tailwind CSS, RTK Query

2025

- Built a modern and responsive web application that consumes the News API to display real-time information.
- Optimized performance using RTK Query for efficient caching and global application state management.
- Designed an advanced user interface featuring a synchronized light/dark mode, pagination, category filtering, and image lazy loading.

Web UI Cloning | Figma, UX/UI Design

2025

- Applied fundamental UX/UI principles to faithfully replicate an existing web interface, focusing on precise spacing, typography, and visual hierarchy.

My Full Stack App - Kanban | React, Next.js, NestJS, TypeScript, Docker, AWS

2026

- Developed a Full Stack Kanban-style web application featuring secure authentication, full CRUD management, and Markdown content editing.
- Implemented advanced interactive features such as drag-and-drop for tasks and columns, and a real-time chat using WebSockets.
- Modular Backend Architecture: RESTful API built with NestJS and TypeORM, dockerized to be deployed via a CD pipeline.
- Infrastructure and Deployment: Configured a PostgreSQL database and deployed the system on AWS EC2 using Docker containers on a single instance, ensuring instant communication and continuous backups.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, HTML, CSS

Backend: Node.js, NestJS, RESTful APIs, PostgreSQL, Supabase, MySQL, TypeORM, Prisma, JWT

Frontend: React, Next.js, Astro, Tailwind CSS, RTK Query, React Router, Inertia.js, i18next, Vite, Material-UI

DevOps & Cloud: Docker, AWS, CI/CD

Tools & Design: Git, GitHub, WebSockets, Postman, ESLint, Figma

EDUCATION

Universidad Tecnológica de Pereira

Systems and Computing Engineering

Pereira, Colombia

2025 - Present
