PROFESSIONAL PROFILE

Motivated Software Developer committed to continuous learning and active participation in both frontend and backend development projects. Capable of building scalable, efficient, and user-centric solutions.

WORK EXPERIENCE

- SwiftControl** Pereira, Colombia
Full-Stack Developer 2025 – 2026
- Participated in full-stack development projects, contributing primarily to design and innovative features applied to business logic.
 - Collaborated within a team of developers, putting continuous and fast-paced development skills to the test.
- Brunchosos Website** Pitalito, Huila, Colombia
Web Developer 2025 – 2026
- Developed a website for a themed coffee shop (Coffee & Brunch), utilizing modern static site technologies and advanced AI tools.
 - Ensured product quality with a strong focus on user experience (UX), performance optimization, and strict fidelity to the client's design specifications.

PROJECTS

- Armando la Navidad | HTML5, CSS3** Nov 2025
- Developed an interactive game using exclusively CSS (without frameworks or JavaScript) to manage layouts, typography, and colors.
 - Created complex animations, fluid transitions, true randomness logic, and CSS transformations, while ensuring a fully responsive design.
- News Portal | React, TypeScript, Tailwind CSS, RTK Query** Nov 2025
- Built a modern, responsive web application that consumes the News API to display real-time information.
 - Optimized performance using RTK Query for efficient caching and global application state management.
 - Designed an advanced user interface featuring synchronized light/dark mode, pagination, category filtering, and image lazy loading.
- Web UI Cloning | Figma, UX/UI Design** Dec 2025
- Applied fundamental UX/UI principles to faithfully replicate an existing web interface, focusing on spacing precision, typography, and visual hierarchy.
- My Full Stack App - Kanban | React, Next.js, NestJS, TypeScript, Docker, AWS** Jan 2026
- Developed a Full Stack Kanban web application featuring secure authentication, full CRUD management, and Markdown content editing.
 - Implemented advanced interactive features such as drag-and-drop for tasks and columns, and a real-time chat using WebSockets.
 - Modular backend architecture: REST API built with NestJS and TypeORM, dockerized to be deployed via a continuous deployment (CD) pipeline.
 - Infrastructure and Deployment: Configured a PostgreSQL database and deployed the system on AWS EC2 using Docker containers within a single instance, ensuring instantaneous communication and continuous backups.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, HTML, CSS
Backend: Node.js, NestJS, RESTful APIs, PostgreSQL, Supabase, MySQL, TypeORM, Prisma, JWT
Frontend: React, Next.js, Astro, Tailwind CSS, RTK Query, React Router, Inertia.js, i18next, Vite, Material-UI
DevOps & Cloud: Docker, AWS, CI/CD
Tools & Design: Git, GitHub, WebSockets, Postman, ESLint, Figma

EDUCATION

Universidad Tecnológica de Pereira Pereira, Colombia
Systems and Computing Engineering 2025 – Present
